DETAILED ACTION

The response filed on 11/11/08 has been entered and overcomes the objections to the title and abstract.

Allowable Subject Matter

1. Claims 27-54, 56, 60, 63-65, 67-91, and 93-106 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claim 27, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 27, and specifically comprising the limitation of a light emitting device where the extraction efficiency is independent the length of the device and a first surface of the device includes a pattern of holes with an ideal lattice constant and a detuning parameter greater than zero, along with the rest of the limitations of the claim.

Regarding claim 56, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 56, and specifically comprising the limitation of a light emitting device wherein the first layer comprises a semiconductor material and a surface of the first layer has a dielectric function that varies spatially according to a nonperiodic-pattern comprising a plurality of non-concentric holes, a majority of the non-periodic pattern having order, along with the rest of the limitations of the claim.

Regarding claim 75, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 75, and specifically comprising the limitation of a light emitting device wherein the first layer comprises a

semiconductor material and a surface of the first layer has a dielectric function that varies spatially according to a nonperiodic pattern comprising holes being devoid of material within a perimeter defined by the first layer, a majority of the nonperiodic pattern having order, along with the rest of the limitations of the claim.

Regarding claim 84, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 84, and specifically comprising the limitation of a light emitting device wherein the first layer comprises a semiconductor material and a surface of the first layer has a dielectric function that varies spatially according to a nonperiodic-pattern comprising a plurality of non-concentric holes; and wherein the non-periodic pattern is configured so that light emerging from the light-emitting device via the first surface is more collimated than a lambertian distribution of light, along with the rest of the limitations of the claim.

Regarding claim 93, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 93, and specifically comprising the limitation of a light emitting device wherein the first layer comprises a semiconductor material and a surface of the first layer has a dielectric function that varies spatially according to a nonperiodic pattern comprising features, a majority of the features having substantially the same size and a majority of the nearest neighbor distances between features being substantially the same, along with the rest of the limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
